PerfectXL Compare Serial Key is an intuitive software solution that was created especially for those who often work in Excel and want to review the changes that were made between two spreadsheets. Compare Excel documents PerfectXL Compare Product Key allows you to browse to the location of your two files (XLSX, XLSM, XLS or XLSB), or you can easily drag and drop them onto the main window. A handy feature is that your selected documents do not necessarily need to share the same format, so you can compare XLS and XLSX files without any issues. The older document should be loaded in the left side, whereas the newer one should be added to the right panel. If you accidentally mixed them up, you can flip them with the press of a button. After you selected the files, the app instantly displays information about them, such as file size, last modification date, last author, or workbook protection status. Review differences in the spreadsheets Once you have loaded the documents, you get a summary with the total number of differences (insertions, edits, and deletions) related to data, formula and structure. You can also review information regarding the number of worksheets in each document. Moving on to analyzing the actual differences, you have the possibility to filter them if you are looking to locate a certain item. Conclusion All in all, PerfectXL Compare Crack Free Download is of great help to all those who want to quickly review differences in their Excel documents, even if they do not have Excel installed on their PC.
