### **What's New in the JPEG PNG Stripper?**

PhotoResizer is an easy to use batch-processing program that allows you to resize any images (JPEG, GIF, BMP, PNG). It uses a built-in "flyweight" cache system, which significantly reduces the time needed for resizing multiple files. PhotoResizer is easy to use with a standard interface that allows you to handle a number of files, image resizing quality and thumbnail size (in 0.5, 2 and 4 times). You can also set the background color to the image and adjust the resolution. You can use a "drag and drop" method to add image files and to make them ready for processing. PhotoResizer is highly efficient and is able to resize files in a matter of seconds. You can choose whether to compress or uncompress the data. PhotoResizer can work with any number of files, it does not have any limitations. You can easily limit the number of saved images (10, 50, 100,...) and also save the resize settings. PhotoResizer has a built-in software cache. This feature significantly reduces the time spent on processing large volumes of data. The cache can be emptied of data, it is possible to reset it to the beginning, change the cache mode, etc. The software runs without interruption and creates two copies of a file: one with resized images and the other with the original file. The software supports EXIF tags and maintains the tags' integrity. PhotoResizer has a detailed and easy-to-use built-in help window that gives you the opportunity to learn more about its features and to quickly solve any problems you might encounter. PhotoResizer is a non-commercial freeware program developed by Admin Software. You can download PhotoResizer in the download.com's Security & Anti-Virus department. It is easy to use and provides users with a number of important features. The interface is simple and convenient. PhotoResizer is a utility program that is easy to install and to use. PhotoResizer is a tool for processing multiple images (JPEG, BMP, GIF, PNG) quickly and easily, without the need for additional computer resources. PhotoResizer does not require a large system resources, which makes it compatible with any operating system. PhotoResizer can easily process multiple images at once and it has a batch processing option (the program does not display the images to be resized). PhotoResizer supports image formats: BMP, GIF, PNG, JPEG. PhotoResizer offers a flexible interface with a lot of options to help you get the best quality of resized images. This means that you can always use the settings you prefer. PhotoResizer is a simple software program that does not have a complicated interface. PhotoResizer is easy to install and use. PhotoResizer does
