Rag2 gamma c-/-/IL2R gamma c-/- mice have a selective impairment of T cell maturation in the thymus, but are otherwise normal. These mice are unique in that they allow the rapid production of human T cells in their spleen and liver without the requirement for exogenous human interleukin (IL)-2. To determine the degree of protection of human cells from nematode infection in vivo, Rag2 gamma c-/-/IL2R gamma c-/- mice were challenged with an Nippostrongylus brasiliensis or Ascaris suum infective larvae. Human CD4+ T cells were observed in the livers and spleens of mice infected with either N. brasiliensis or A. suum larvae. Despite this, there was a significant reduction in worm burden in mice infected with either parasite.LaSalle Medical Group LaSalle Medical Group is an American health care management company based in Chicago, Illinois.
