Windows

Key Features of the Email Server ◆ SYSTEM COMPATIBILITY This email server supports Windows Server 2003/Windows Server 2008/Windows Vista/Windows 7. ◆ INSTALLATION The installation of the Email Server is simple and quick. Just follow the steps in the instruction manual or the video tutorial on the website and you are done! ◆ ACCESS You can view the status of the server, create Aliases, Manage your mailboxes, forward email and add users to your email domain. ◆ CROSS PLATFORM The Email Server will run on any platform that supports an X86/x86-64 CPU. It supports the latest Windows OS, Linux and FreeBSD. ◆ E-MAIL STORAGE The Email Server allows you to store all of your email in two mailboxes - Inbox and Archive. You can recover email from the Archive mailbox for example when you want to create a backup. The Email Server is well equipped with many features like storage limits, quota, maximum number of mails, etc. Minimum System Requirements Windows Server 2003/Windows Server 2008/Windows Vista/Windows 7 Computer with at least 256MB of RAM Computer with 2GB of free hard disk space Intel or AMD Processor Internet connection Disk space for the installation files: 700MB Minimum For those who have never used an email service before: Install Windows Install CapeSoft Email Server We strongly recommend that you install the Email Server on a separate computer to the one you will be using to access it. Remote Access Guide to Remotely Accessing the Email Server E-mail hosting has never been so convenient and affordable than it is now with the CapeSoft Email Server! At CapeSoft, all email servers are compatible with all major email clients which includes Microsoft Outlook, Gmail, Yahoo Mail and Thunderbird. We provide everything that you need to set up and operate your own email server including the email software itself which is easy to install and use. You also need to have an e-mail account with us in order to host your email on the email server. In other words, you will need to provide e-mail addresses to both your company and the mail server - this usually requires you to get a separate e-mail address at the same time. However, you will need your own e-mail account in order to forward email using the Email Server. If b7e8fdf5c8
