Viking Trickshot is an award-winning, cross-platform, physics game where you throw batons (or logs) to knock over your opponents and finally take down the tall trees to win the game. Based on the real Viking game of kubb, taken to the extreme..... Based on the real Viking game of kubb, taken to the extreme, Viking Trickshot is a cross-platform, physics game where you throw batons (or logs) to knock over your opponents and finally take down the tall trees to win the game. You can play 1 player with bronze or silver trophies, or 2 players (on shared devices or online) to win gold trophies, but you don't have to - just look for another player to play with. The rules are deceptively simple: throw batons (or logs) to knock over your kubb (log) while trying to avoid theirs, and finally take out the king to win! But knock over the king too early, and it's game over! The free BASE GAME includes more than 50 levels (combined) with the two core batons, and unlimited online multiplayer. A one-off in-app purchase for the FULL GAME will allow you to unlock all remaining content and mechanics, including any future updates. FULL GAME FEATURES: - 50+ 2 player levels (local multiplayer/shared device or online) - 50+ 1 player levels with bronze/silver/gold trophies to earn - Fun and challenging achievements for the completionists - Custom drawn and animated characters and worlds to unlock by completing 1 player levels - A handful of different batons with fun mechanics, and levels designed to complement them - Custom made epic soundtracks TIPS: - The controls are a little tricky! Don't worry if you don't get 'em immediately - it won't take long - 2 player is best enjoyed for the lols. See a potentially crazy shot? DO IT - You can play 1 player while searching for someone to play with online - Don't go for gold straight away when you start 1 player. Fly through bronze first to unlock everything, then come back for gold - Some gold levels are much harder than others. If stuck, skip and come back later - You can tune the game's difficulty (both ways) in the

Features Key:

- Single player campaign against AI enemies
- Play custom matches online with up to 4 players
- Collect achievements and compete with worldwide players
- Use the Force against the AI and other players
- Change your skins with cosmetic items of your choice
- Train new skills

If you like Cooking Games, Timer Based Games, Helping Games, where you will be helping others, then you will like this game. In this game you will get help all NPC's, to be more specific, you will help: A young boy that has a crush on you, 2 amazonians that need help finding a ship, A stork that needs help delivering his newborn, 5 crows that need help preventing a forest from burning, A salmon that needs to survive a treacherous river, 5 ducks that need help raising a duckling, 5 orc hunters that need to kill an angry elk, and A man that has lost his job, house and loved one in the woods, and so much more! There is a total of 6 objectives you will complete in the game. 1) Build a Boat, so you can travel. 2) Find 5 useful items to give to this NPC. 3) Save this NPC's Life. 4) Deliver something, so this NPC can live. 5) Free the animals from captivity, so they can live a normal life. 6) It's not required, but it will feel better to help those around you. The Game has a controllable timer, where you will help the NPC's and unlock different levels. How to play: Press the Button on the left to start each level. When you get to the pink area of the screen, press the Button at the bottom right, to turn on the Character's timer. When the timer reaches 0, press the Button at the bottom left, to go to the next level. What you can choose: You can choose between 3 Hours and 6 hours. How fast or slow the game runs, will depend on the amount of timer, you have set it to. If you notice the game has slowed, do a mid-pause to help the game load faster. When you press the Button at the bottom left to do the next level, it will take you to a random NPC that needs your help. If you like the game, please rate and leave a comment, and if you want to buy the game, please choose "Buy me a coffee" Controls: - The left Button is for the timer, pause and go to next level. - The right Button is for selecting the Number of Hours. - The Bottom Left Button is for the Character Timer. c9d1549cdd

What's new in Carpe Diem:

PC game is out, a little at the expense of your eyes Share this: Simulacra, the team behind the vertical skyline simulator, PC game Simulator 2015, is behind the release of its PC version. For whatever reason, The sim developer decided to ignore the existence of indie titles in the genre, and highlighted the benefits of using Unreal Engine 4 to develop their existing 3D environments. As always, in the first trailer for the game, we have the old GTX 700 and GT 840 voodoo cards to play it from. What do we think of the game you may ask. Well, although it can be interesting, in the short term we are just laboring under the false belief that grass is greener on the other side of the fence. The Simulator 2015 is a real-time construction and planning game from the developer known as Simulacra. It is being developed for PC using the Unreal Engine 4 (2013.53.4560) and so it's available to download now for free. It is a construction simulation game in which you are able to build skyscrapers to maximize profits. Horizontal city sets covered in a variety of free downloadable content (modular content) that also have a limit of how many you can use at once. The controller is synonymous with video games, as many people refer to it as the "holy grail" of user experience. You can use it to play any kind of game, and although it can simply be plugged into a TV, this often leads to poor user experience as the UI is not optimized for HDTVs and thus it takes a lot of scrolling to scroll through the menus on the edge of the screen. Moreover, when connected to a standard monitor most games will not take full advantage of the screen, and can leave you with a small window on a full screen. A true multitouch gamepad can probably solve this problem just by using it as it was intended, but an alternative solution is to use the standards gamepad in the absence of a physical gamepad. Konami's response to this phenomenon is their patent for a portable gamepad called the "SkyController". The device is simply a stick that contains a trackball, along with a connector in the middle of the stick. It can be plugged in to your console with a standard controller cable, and uses an "HD rumble"

Diabolical is a real-time, story-driven, wordless interactive text adventure. It's text-based, but there are no graphics, music, or sound effects other than those produced by your character. (That said, Diabolical's text-based "voice" is absolutely pitch perfect.) You can read the text aloud, or in an eerily authentic whisper tone, if you prefer. To understand the text, you will require a basic knowledge of computer programming. Ages 16+ As low as \$1.99 to forever and always If you have any questions, or just want to discuss the game, please ask me in the comments. It's easier than clicking "tweet" or "post" and requires no confusing four-step process! INSTALL INSTRUCTIONS (Mac): Windows: Linux: What is it? Diabolical! is an interactive story of real-time choice and consequence, with no graphics, no sound, and no music. It's a 30,000-word interactive novel without the limitations of traditional stories, or the limitations of being text-based, but with all the perks of a graphic novel, including: You are in control Read the text aloud, if you like, or in a chilling whisper. It's completely customizable See the setting, your story's characters, and change their appearances. Choose a custom voice for your character, and see how you sound to them. It's totally interactive When you choose the narrative path you take, the effects are ongoing and affect you and your friends! It's goth You are a villain who steals the world's largest ball of aluminum foil, and join the ranks of other super villains such as Dracula, Godzilla, and Sauron. I'm entirely self-published. This game is available as a digital download through wordpress.com and as a soft-cover book with boxes (and boxes of boxes) of Aluminum Foil. Come along for the ride. What is the world's largest ball of aluminum foil? LEFT: The world's largest ball of aluminum foil is made by Nobel Labels and measures 1,728,588 sq. inches, or just over 26,000 square feet. It weighs 1,
