Main article: FIFA FIFA (pronounced "fe-fa") is a series of association football video games. The primary series, produced by EA Canada since 1994, employs current rules of the game and is the best-selling sports video game series. EA publishes series sister games for various sports. What is football? Football is a type of sport played between two teams with a ball. Powered by Football The Most Comprehensive Game Engine Ever EA SPORTS FIFA 22 features more animation than any football game before. Every player is fully animated, not just the head and limbs. FIFA 22 also features a new leap pass, new throws from all players, new tools for free kicks, and more. New Standard of Play All football games in the past relied on the same mechanics, and the action was by far the most realistic. But FIFA 22 is the only football game to evolve how real-life football is played. Every part of how you control the ball, and exactly how players respond to your commands, has been changed to make FIFA the most authentic football game yet. Revamped Pass the Ball From the first touch to the last pass, every aspect of passing the ball has been overhauled. The new pass animation provides more variety and touches, making passes more tactically interesting. The new leap pass provides a more agile way to reposition the ball when passing. A New Standard of Skill Get ready for an improved crossbar and goal. A new, more intelligent placement system ensures shots are harder to take. Harder and more regularized foot-balls will provide more variety for goals and spectacular goals. Partnerships with the Premier League, the Association of European Football Leagues and Major League Soccer FIFA 22 partners with Arsenal, FCA, Everton, Leicester City, Liverpool, Manchester City, Norwich City, Newcastle United, PSV, and Real Madrid to showcase the global popularity of their clubs. Today's Top Players Wanted FIFA 22 focuses on transferring the top, global stars like Neymar, Eden Hazard, and Gareth Bale from the Premier League. Plus, a new difficulty mode enables you to play with the best 16 players in the world. Dynamic Local Player Integration Player movement and positioning will dictate gameplay. For example, you can now see players' next moves on the global map and counter their moves
