To be able to play in this game you need to own 2 or more accounts in Steam. 1. Fulfill the game selection in the Steam library. 2. Click on the 'PLAY" button. 3. The game will be downloaded to your Steam's libraries. 4. You'll be asked to confirm Steam ownership of the game, hopefully you have it ready. 5. You'll need to create your accounts in Steam. 6. Your characters should be set to public. 7. Inside the game's directory find the 'de' sub directory, inside of there are the individual maps which take your character from a menu to the map 8. Run 'vm-server' (or just use the game while you are logged in). 9. You're ready to play! If you can't find the server run it by typing: vm-server This could work on your friends computer if they have steam installed but their PC doesn't have the Steam client running. You can ask them to restart Steam and Vm-server and then connect. If your on LAN there should be no issue connecting to their computer. If you're using cross play, cross play should work from your friends computer. There are many maps for you to play. I chose the first one that was available, you'll get a map with 50 games on it, can choose from all of them on the main menu. First try to practice the controls. You can lock the camera in place by hitting the 'CAPSCREEN' button, which you'll find in the bottom left corner. The map is viewable on the bottom left corner of the screen. This should give you a good indication of your location This game is meant to be played over teams. You can press F1 to go into the command menu, The 'e' key will go into the start menu and the 'q' key will close the menu. While you're in the game press F1 to get into the command menu This game is pretty hardcore, my explanation wasn't as good as the game supports 5 languages, english, french, spanish, russian, and polish. You can change your name by pressing 'P' inside the command menu. If you press any of the following keys 'l' 'a' 'd' 'd', 'w' 'n' 'e' 'v' 't' 'y' 'u' '

How To Install and Crack Hearts 3D Premium:

- **First things first, you need to do a crack!!**
- **No, you don't need a crack to play Hearts 3D Premium, but as a matter of fact, it is suggested that you have one.**
- **Once you have installed the crack, and got your game running, and all of that. You have 2 ways of doing the Hotswap!**
- **The first method can be found after beating the game. There is an option that will allow you to send a request to the other players, to convert the mode to the faster one.**
- **The second way is more advanced, the method will require you to use a HIB for the game. The first step would be to sign up and use a HIB by clicking on the dropdown menu. Afterwards, match with another user on this same site!**
- **Once you are on the same page with another user, you will be asked a few questions, such as what you are wanting to do. Say Hotswap! If you want to do it right away, you will have to download the HIB File, which you will find attached to the request you just made! Once you have done that, follow the steps in order, and in a few minutes you should get your Hotswap request!**
