Contents. 1 History; 2 GameÃ: jQuery to find.container and wrap it in an ? I have a widget that dynamically generates a number of 's when it loads. I need to find the first.container in the document, for each dynamically created , and wrap it in a tag. I'm relatively new to jQuery and can't seem to find the right syntax to do so. The syntax I've tried is: `s(" .container").wrap("")` A: Try this `s(".container").each(function(){ s(this).wrap(""); });` Q: Github: Pull request to separate branch I have a repository with 2 branches, master and release, with a master branch created after release. I have a Pull Request for release with branch "release". How should I see this PR in Github dashboard? I don't have a separate project and it is quite confusing how to have 2 branches, 1 in master and one in release with two different pull requests. A: A pull
