1. Field of the Invention The present invention relates to an electronic device, an image forming apparatus and a method for controlling the same, and more particularly to an electronic device, an image forming apparatus and a method for controlling the same wherein a processing device is controlled. 2. Description of the Related Art In general, an image forming apparatus such as a copy machine includes a memory card. While copying an original document by reading image information from the memory card, a function of the memory card may be limited. In this case, it is necessary to replace the memory card to perform the function of the memory card again. To prevent degradation of image quality due to such replacement of the memory card, there is known an image forming apparatus with a function of detecting whether or not the memory card is present. Japanese Patent Laid-Open No. 2007-57688 discloses an image forming apparatus which includes a memory card presence information detecting unit to detect whether or not a memory card is present. Japanese Patent L
