Bjorn Berg, Director of FIFA at EA SPORTS, says “While you might know that FIFA is the best football game in the world, the graphics in FIFA can often be considered somewhat dated by today’s standards. This year’s graphics update is inspired by our player motion data, giving players an improved, reactive representation of the world’s best footballers.” The FIFA World Cup™ entry also introduces new stadiums with enhanced animated crowds and a redesigned King’s Cup and Club World Cup finals. FIFA 22 also introduces 4K Ultra HD support for the first time in the FIFA World Cup series and improves lighting and shadows, even with cloudy conditions. For a full list of changes and improvements in FIFA 22, including the introduction of HyperMotion Technology, visit: [Key Features The Official Team of the FIFA World Cup™ Seamlessly Immerse You in the Beautiful Game](#)

Football. The world's favourite sport. It's unpredictable, intense, overwhelming. It brings people together and divides them. It's both beautiful and ugly, raw and brutal, as only the world's most passionate game can be. And it's everywhere. Every FIFA game is a celebration of football, the greatest sport in the world. FIFA is football for everyone. It's a sport where anything can happen, where there are no sides and no referees. The worst players can shine, while the best players can disappear. The most talented managers can fail, and the unluckiest can win. Top-notch competition inspires players to become their best. Newcomers can learn, and veterans can recover. No one is given anything. Everyone has to earn it. So when we build a FIFA game, it's important that we do it right. Because football is football, and you can't just remake it. You have to make a football game that fans want to play again and again. And it's not just a football game. It's a living, breathing extension of football. We inject our DNA directly into the sport. From the materials used in the kits to the animations in the player models, we have total control over every last detail. There's no hidden AI of player personalities that the FIFA series has relied on in the past. We're making this game from the ground-up. We know you're busy, so we've made it our goal to get every great detail right, while reducing the workload on your time. FIFA 20 was our first take on the gameplay philosophy, and it's paying off big-time. We've also learnt a lot about how to best capture the feeling of a football match. And FIFA U19 IS coming - FIFA U19 IS coming! We're not stopping here. We know that we're only at the start of our journey with FIFA - and that our future is only bright. FIFA is a football game, and there's plenty left to do. It's time to take FIFA in a new direction and do things that haven't been done before. We need to introduce players to an authentic, authentic FIFA game. We need to bc9d6d6daa
