It gives you an interface for creating iPhone Ringtones without any particular skill and lets you pick the audio that you need and how often it is repeated. In order to make use of this interface, you must have Nero AAC Encoder installed on your system. iPhone Ringtones contains also a User-friendly interface (like a drum machine), so that you will spend as much time as you need to fulfill the task at hand. A CUE sheet is automatically generated if the file is properly saved. By default, the interface uses the current playlist files as a reference, and will automatically update itself every time the user adds/deletes songs to/from their iTunes library. The user can also choose a ringtone folder of his choice. iPhone Ringtones includes also an automatic preview of the selected ringtones in order to ensure you select the exact tone(s) that you want. You can also select the time/duration of the tones or the repeat time. iPhone Ringtones also supports the automatic saving of ringtone sequences, so that a sequence of tones can be saved without having to create a separate ringtone for each. iPhone Ringtones also provides you with quick access to the interface, via a customizable shortcut icon. iTools Audio Recorder Pro is an advanced audio recorder. How to use: \*iPhone Ringtones is a graphical interface for the Nero AAC Encoder. \*iPhone Ringtones uses the main core of the Nero AAC Encoder (enc) and the core nrpextract tool (nrpext) in order to use them without any of the nero AAC Encoder's other GUI. This part is handled by a helper win32 application that when started by the iPhone Ringtones program will, using appropriate dialogs, open the nero AAC Encoder and nrpextract and add the files to the standard iTunes library. \*iPhone Ringtones does not include the core components that are needed for basic or advanced usage of the Nero AAC Encoder. They are provided as an option. The core components are the "Copy settings dialog" which allows one to use nrpextract to change settings, such as profile, bitrate, channel mode and others, and a "copy settings dialog" which allows one to use nrpextract to create a new profile (save new settings) and save it to file. The "Application Settings" are also provided as an option but are required for advanced use of nrpextract. If the user is using "Application Settings" it is advised that he or she understand and is comfortable with the available basic or advanced options. \*iPhone Ringtones does include the the nrpextract tool (nrpext) as well as a helper nrpextract GUI application (nrpextGUI). In order to use nrpextract, one must have the core nrpext application that will be called if one chooses to open the "copy settings dialog" or "new profile dialog" option. \*iPhone Ringtones does not include any kind of nrpextract GUI functionality but does include an improved core nrpext application. \*The app is written in delphi but can be used in any Delphi compatible environment. \*This utility has been tested on OSX and Windows 7. It will not run on OSX Lion and above due to limitations in the interface. The application uses a graphical interface in order to get the best user experience. This is by far the best method to use a mp3 encoder or
