You can define a specific color for each note you add, at your own will and discretion, to clearly and instantly identify the text. A customized note format that permits you to highlight text. Full support for scripting languages such as Java and Python. Ability to format and print notes. Sync notes to Windows Address Book or other contact's address book. Native QuickNote format (.qnt) file support. Archive file (.pst) support. Editable text format (.txt). A Windows native version. The themes you can apply are completely up to you, allowing you to choose the color of the notes you create. I have this application for many years. I have tested some users reviews, and the application is very buggy. The start menu button is buggy, the buttons inside the.txt files are buggy, the notes button is buggy, the edit menu is buggy, the options are buggy, and so on. One of my notes file is corrupted...it's impossible to remove its header or footer. Now I'm trying to delete this corrupted file and also delete some other corrupted and unusable files inside, by deleting them inside the program's folder. Unfortunately, just with the program, when I hit the Ctrl+C button on Windows, to delete a corrupted file, the program itself is deleting it. I am losing everything. I just want to delete all these corrupt and useless files, and the application doesn't let me do it, and when I hit the Ctrl+C button, the program itself is deleting them! I don't want to pay for this piece of crap. It's really unusable. The application is buggy, the start menu button is buggy, the buttons inside the.txt files are buggy, the notes button is buggy, the edit menu is buggy, and so on. I suggest the developer of the program to make a better application, that's easy to use, that's easy to understand, that's stable, and that's NOT buggy!!! It's a pity that the application doesn't support most of the operating systems, I have tried the.lnk, but it's useless, the start menu is buggy, the default themes are very ugly, and there are many programs that are much better than this application, and the developer of the application uses a.lnk file to let the user download all the information of the application from his website...a.lnk file is useful to let you know if you aa67ecbc25

There are a lot of features that can help you improve text you're dealing with. Care2 notes does just that, and this means you're bound to have a more efficient and more productive process in general. How does it work? Care2 notes is a text editor specially designed to help you deal with the formatting of a text document. The program does pretty much what it's name suggests - it includes all the features of a regular text editor and gives you the possibility to improve and enhance the text you're dealing with. Care2 notes can be run as a standalone application or embedded in your application, so you can benefit from it regardless of the program you use. What is special about Care2 notes? When dealing with a text editor, the first thing you have to do is open or create a document. Care2 notes allows you to open any document you want, thus giving you a more versatile application in the first place. It can be used to create documents, but it can also be run as a standalone editor. It does not require Windows applications like Microsoft Word to be able to create and edit a text document. Common features With Care2 notes, you can easily create and save new notes. The program can be

What's New in the MyWorkNotes?

* Take notes from your web browsers, documents and applications. * Create as many notes as you like and color-code them. * Organize all your notes in one archive, which is accessible from the system tray. * Create notes either as one long line or in a table. * All notes are stored on your hard disk until they are archived. * Search your notes by keyword. * Undo and redo all your notes. * Keep track of all the notes you have made. * Use automatic note taking to simply save a web page. * Use autocompletion to quickly create notes from frequently used keywords. * Mouse click to create notes, notes/colors can be specified in "Customise" tab * No mouse clicks needed to create notes ** Auto note taking is optional, disabled by default. If you do not wish to use this feature, you can turn it off in the options by unticking "Auto note taking". myWorkNotes Verdict: A simple yet powerful application that makes it easy to organize and keep track of your notes. Whether you're a student, a co-worker or simply a busy bee, myWorkNotes is a solution you should definitely consider. A good solution for people who'd like to organize their notes more easily, and who often have to deal with lots of information to remember. [Show full reviews] Simple but effective Now, the first thing you might think when dealing with this application is the fact that it's yet another noting pad. myWorkNotes does differentiate itself from the rest of the similar programs, firstly by allowing you to customize your notes, their color, and secondly by giving you the chance to format the text you add to each of them. Color-coding could be a solution for more clearly identifying and dealing with the task you're currently facing. Some other features While it can be confirmed that the app has included the most important options the users would expect from such a program, the developer has also included some extra features. One of these allows users to align all notes on the desktop. The archive, itself, where you can store all created notes, is another special feature that makes myWorkNotes stand out in the crowd of text editors. The app can be summoned from the system

tray, which ultimately means that it won't be clogging your taskbar without reason. myWorkNotes is an application worth trying if you need to organize your thoughts or work in
