What's New In?

Vigilog is a logging and monitoring tool for Unix based operating systems. It records and displays the system activity from the shell, including log messages, CPU load and network traffic. It features compact, human-readable text format output, multiple display methods, and on-line search and filtering facilities. Vigilog Features: A: Logwatch is a linux tool that keeps track of system logs and downloads them via email. A: I like to use Cluagion for this purpose. Paul Ryan, Speaker of the House, recent convert to the cause of gay marriage, has invited three gays and two straights on his ticket in the New Year and we won't even be surprised if a few more "evangelicals" come along. In an interview with the magazine, "CBS This Morning," the Wisconsin Republican, fresh from voting against gay rights measures when he was a member of the House of Representatives, said the federal government should stop telling people how to live. "I don't think the federal government should be using its power to try to compel people into this lifestyle," Ryan said when asked about gay marriage. "That's not what this is about. It's about equal protection." Ryan pointed to the nation's past anti-Catholicism, once widespread, as the time when government should not be involved in imposing one way of life on another. "Let people live according to their conscience," he said. "Our motto in America should be: Live and let live." A Pew survey released last month found that 38 percent of Catholics and 45 percent of Evangelicals support allowing gay marriage. Even so, although he has endorsed gay marriage, Ryan is not ready to commit his political future to it. "I think it's hard to say what the future of marriage is and what the future of the issue is at the federal level," he said, "especially for a politician, because if you say something and it doesn't work out, it's really hard to say." He said he'd be willing to take a more considered position if Republicans are on the ballot and "I'm trying to figure out what works." "It
