The main goal of STROKE Networking is to provide a rich and complete library of icons for all network related applications (e.g. wireless, computing, e-mail, databses, web, multimedia, databases, hardware, network solutions and other) to help the graphical user interface designers communicate your products better. STROKE Networking is a product of Videcoder Ltd. STROKE Networking License: Free to all non-commercial and non-profit users. You know the scene from Raiders of the Lost Ark: it's after Ark of the Covenant has been found on the Sankara Stones, and Indy goes into the bathroom to ponder the consequences of returning it to its secret hiding place. As he approaches the bathroom door, the camera cuts away to follow the door handle, slowly turning from the classic left to right while Indy's assistant, Marion, peers out of the bathroom, her hair just as thick and her sweater just as red as the famous scene. But why didn't the door open for Indy? And why isn't there an assistant lurking behind it? The answer to the former is twofold. For one thing, a door only opens when someone's holding it open with the back of their hand, which is usually only an option for people with body parts on the inside. For another thing, Indy doesn't realize he's holding his hand against the side of the door, which is just a quick way for someone to reach around and stick their hand in. There are no assistants because a lot of people are killed after something good happens to them. For example, Marion dies before she reveals the location of the Ark, and Dr. Henry Jones dies right after he hands Indy the Ark. So, from that one scene, two things became clear: (1) Indy was never alone; and (2) Indy was never in danger of dying. This b7e8fdf5c8

STROKE Networking [Mac/Win]

Save 50% for a limited time. More information is available at: STROKE Neon Snapshot is a beautiful set of modern icons set specially designed for start-ups, computer games and web applications, with a wide range of preview samples from our icon set of 100+ icons.
