They are reddish-brown with a white belly and a long, angular bill. The name "miasma" derives from the ancient Greek term for invisible killing fog, and implies a substance that induces catatonic insanity. Miasma is the creation of an experiment carried out by Dr. Alloy in his laboratory at the Longbow. After being sprayed by him with miasma, Dr. Alloy's assistant catches the miasma on a slide, thereby creating the first goo

Metal And Hauling RPG Simulator PC/Windows

The tank has two weapons - the main cannon and the second-strike rocket launcher. The former will be used primarily to destroy opponent vehicles, while the rocket launcher will be used to defeat the walls to get coins.Cannon: In the arena, the cannon is used to destroy the opponent vehicles. The aim of the game is to take out the opponent tank before his/her rocket hits the ground. First of all, you need to improve the gun accuracy by spending the coins. By upgrading the accuracy of the cannon you will be able to make shot calls more accurately. If the shot hits the target, the earned coins are added to your wallet.Second-strike rocket launcher: In the store you can upgrade the rocket launcher that will be used to destroy the destructible walls to get coins. If the player destroys the wall in the given amount of time, the coins that were collected will be added to the wallet. You can also improve the armor of the tank while it is in the air by spending coins. I have been working on an indie game for the past few weeks;it's called JETPOP, and it's about a boy at a dog-fight arcade... also, if you like my project, then check out my other game, a 3D platformer called Running ByGun called "Gun Runners" in Google Play right now! Last edited by Flying Dog on Mon Oct 25, 2017 4:06 pm, edited 1 time in total. Well, I am back, after being too busy to get updates on this thread for more than a week, but I'm really glad to be back here. I want to say thanks to everyone who has replied with their thoughts on my game, it really means a lot to me. And so, as of now, I'm back to fix things up on the app store, and make this game something more of an actual game. In this thread, I'll be giving everything I have to say a line or two, and then later in the thread I'll be talking about what I've updated in JETPOP. 1. INTRO Well, as of now, I am not really sure exactly what this intro should be, but I'm thinking about something simple and dynamic, like maybe a spaceship is falling and it all gets cut away to something like this: Note: I'm in the process of adding a music section in the store, so if anyone wants to play the music,

What's new in Metal And Hauling RPG Simulator:

3! - Volume 3 RPG Maker VX Ace - RPG Maker 3 Music Pack 3! - Volume 3 RPG Maker VX Ace - RPG Maker 3 Music Pack 3! - Volume 3 In this DLC we have three new music made for you! Countless time and effort went into the production of these, so we hope you will enjoy them as much as we enjoyed making them for you. Have fun!! Also, remember, you can use Mixer (audio mixer) to create complete audio work for your game! Here's a quick tutorial: Step 1- Choose Mixer & import the music(s) you want to have in your audio mix. In this case, we will create a bass/soundcloud mashup!Download Mixer - Step 2- Create a new audio mix. Play the music in your game and make adjustments, add effects - smooth the bass (especially if playing on small speakers!) and hear how it fits better into your game. Remember! Try to keep as much bass as possible for a more powerful hit in the system. If you can't hear any bass at all, try lowering the crossfade. Thank you for your feedback, we believe that the sound we have now is much better! If you like the work we have made, please follow, like, rate it and subscribe to our channel! :D
