You start by setting up your drawing: adding data, placing entities, drawing components, and so on. The document is then saved for future editing and printing. Use the tools in AutoCAD to create drawings or documents. For example, you can draw freehand, use the eraser, and paint directly on the drawing surface. The drawing is saved as a DXF file. You can choose to save the file as DXF, DWF, or PDF. DXF is the native format of AutoCAD. It is also the industry standard and most well-supported format. After you have saved the file, you can preview and check your work. You can save the file as another file type, or print the file.
