Elby Clonedvd 2.9.3.0 Keygen.epub Downloads Q: Struggling with Float CSS : If I change my screen resolution the

menu adjusts I have a problem with the css menu on my website I have a background image, which I define in my css as `background-image: url("1.jpg");` This works fine. But if I put height and width settings on the image, and set it to 100% for the div that contains the image, the background image resizes it's self and just looks bad when on a screen resolution smaller than 1536 x 1024. So my question is, is there any way to make the background image just scale like a picture, but be exactly it's original size on a bigger screen resolution?
