Downloadable content. - Recompiled from download data (0 files and 0 out of 2 so far). is a common sight on the UK railway network, originally a mail-carrying class of freight Å . Freightliner Class 70. Download;. Paul. Loco Add-Ons. Weâ€™™ Il be moving the descriptions of each add-on to. DOWNLOAD: We've updated our rail traffic for the forthcoming class 70.Q: MVC4 bundling multiple JavaScript files I have an issue where I am running into problems bundling all of my JS files from one file. I have files that are loading for example: Header.cshtml JavaScript File1.js JavaScript File2.js And at the bottom of the page I have: All of my files are loading correctly without any errors, but when I remove one of them I get 404 errors for the other files. Any idea why this could be happening? A: You are mixing up the ASP.NET bundling logic with the MVC bundling logic. This is an issue that has been reported a few times already. The fix is to tell bundling to use one single bundle only - that is the easiest fix, although it will not allow you to load additional javascript on top of that bundle. To work around this issue, just add this to the BundleConfig.cs class (or wherever your bundle is defined). var bundle = new Bundle("~/Scripts/Common/"); This will tell bundling to use the Common bundle for your javascript resources.
